4. FIRST AID MEASURES

- 4.1 First Aid:
INGESTION: If ingested, do not induce vomiting. If product has been swallowed, drink plenty of water or milk IMMEDIATELY. If the patient is unconscious, never give water or milk to an unconscious person. Contact the nearest Poison Control Center or local emergency number. Provide an estimate of the time at which the material was ingested and the amount of the substance that was swallowed.
EYES: Splashes are not likely; however, if product gets in the eyes flush with copious amounts of lukewarm water for at least 15 minutes. If irritation occurs, contact a physician.
SKIN: If irritation occurs and product is on the skin, rinse thoroughly with lukewarm water followed by a thorough washing of the effected area with soap and water. If irritation, redness or swelling persists, contact a physician immediately.

Remove spilled material with absorbent material and place into appropriate closed container(s) for disposal. Dispose of properly in accordance with local, provincial and federal regulations. Wash all affected areas and outside of container with plenty of warm water and soap. Remove any contaminated clothing and wash thoroughly before reuse. For large spills (e.g., ≥ 1 gallon), deny entry to all unprotected individuals. maximize ventilation (open doors and windows) and secure all source of ignition. Dike and contain spill with inert material (e.g., sand or earth). Transfer liquid to containers for recovery or disposal and solid diking material to separate containers for proper disposal. Remove contaminated clothing promptly and wash affected skin areas with soap and water. Keep spills and cleaning runoffs out of municipal sewers and open bodies of water.
